

## A Better Supply Chain

Solutions for better performing supply chains through end-to-end visibility, increased data accuracy, global agility, and more confident decision-making.

### Highlights

- Powerful, yet affordable tools to support important, cost-sensitive activities around selling to your customers and buying from your suppliers.
- Manage your entire supply chain through a single, easy-to-use console with multiple ways for trading partners to connect.
- Rest easy with powerful workflow and alerts that monitor activities and help ensure they stay on track.

### Today's Supply Chain

Today's most successful companies recognize that their supply chain organizations are no longer cost management centers. When strategically leveraged, they can be drivers of significant value across the organization. In addition to the positive impact on key performance indicators (KPIs) such as overall cost of goods sold (CGS), product quality, manufacturing yield, and inventory turns, supply chain organizations are now driving global supply sustainability, higher customer satisfaction and, ultimately, increased competitive advantage.

### Our History, Your Advantage

For more than a decade, TAKE Supply Chain has delivered innovative solutions that enable organizations to take control of their supply chains for more rapid and more confident decision-making across their evolving supply chain operations and networks.

TAKE Supply Chain helps companies get to better performing supply chains faster and with a lower total cost of ownership. Our "solution-as-a-service" approach delivers a unique combination of software and services designed specifically to roll out and begin delivering value in a very short amount of time. Powerful software helps automate the end-to-end supply chain to improve visibility and control while reducing costs. Our TAKE Forward program delivers initial implementation services and then ongoing expert support for all your internal users and all external trading partners to ensure sustainable trading partner acceptance. Together providing a powerful combination that helps safeguard success, while being packaged affordably to minimize additional costs and surprises, delivering a lower overall cost of ownership.

# Solutions

## Supply Chain Collaboration

Our supply chain management/collaboration solution connects you to your customers as well as your trading partners for stronger, more visible, and more accurate business interactions and status updates. All activities (sales orders/purchase orders, inbound/outbound fulfillment, and accounts receivable/accounts payable) are managed through a single, easy-to-use system that keeps all data current with back office systems. The modular options allow you to deploy only those areas that are most important to improving your supply chain operations.

## Data Collection

Our data collection solution connects warehouse, logistics, sales, and field service staff to your Oracle 11i and R12 EBS system from anywhere for increased real-time inventory accuracy and movement in, across, and out of your organization to your customers.
